

Sprint 3 Report

Kakaw

Kakaw Team

5/22/2023

Actions:

To stop doing:

- As a team, we should stop overestimating the amount of free time we have.
- As a team, we should stop procrastinating on tasks, especially when some tasks depend on the completion of others.
- As individuals, we should stop combining multiple tasks into one PR.

To start doing:

- As a team, we should start holding each other more accountable for doing work in between scrum meetings.
- As a team, we should mark out which tasks are connected to allow for members to communicate their effort.

To keep doing:

- As individuals, we should continue to peer review each other's work so that we can ensure clean code is being merged
- As a team, we should continue to help each other out when we run into blockers.

Work completed/not completed:

Completed:

- [IT 3.0] Infrastructure tasks
- [MVP 1.X] Finish MVP
- [US 2.1] As a student, I want to be able to view the score of other students, including my own, so that I can gauge how well I understand the material relative to other students.
- [US 2.2] As a Professor, I want to view the quiz results as grades/scores so that I can understand how well my class understands the material.
- [US 2.3] As a teacher, I want a timer so that I can maintain a consistent pace on the quiz.
[2]
- [US 3.1] As a teacher, I want to provide QR codes for easily joining the game without typing in the code.

Not Completed:

- [US 1.6] As a student, I want to select what I think is the best answer out of some answer choices given to me so that I can participate in the quiz.
- [US 2.5] As a professor, I want to be able to experience a fully functional question editor.

- [US 2.6] As a Teacher, I want to export quizzes in a readable format so that students can review quiz questions off the app on their own time.

Work completion rate:

Period: 5/10/2023-5/23/2023, 14 days

User Stories Complete: 4

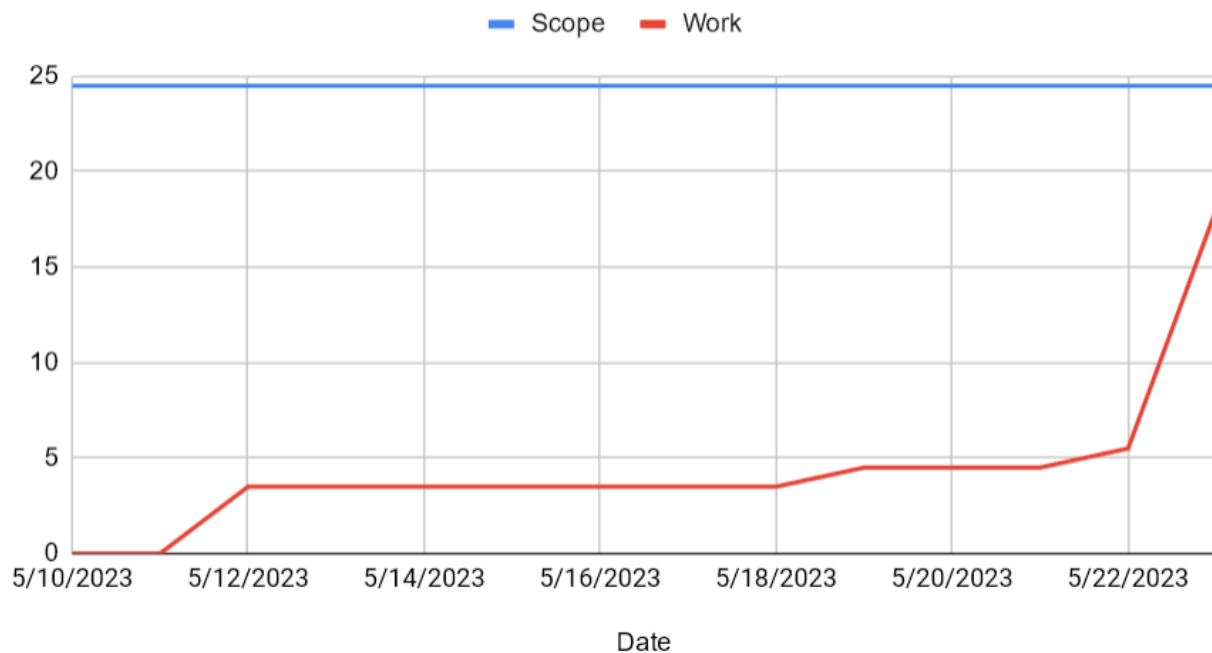

Ideal Work Hours Complete: 18

User Stories/Day: 0.29

Ideal Hours/Day: 1.29

Burn-up chart:

Burn-Up

(Many tasks were left in review until the end of the sprint, resulting in the seemingly dramatic spike in work done on 5/22/2023-5/23/2023.)
