Definition of Done

A written checklist to fulfill before a task is qualified as complete.
These requirements are not all sequential, meaning some of them will be fulfilled out of order.

1. Task has its own branch apart from main in GitHub
2. Implementation of the task is checked into GitHub inside of its corresponding branch
3. Implementation passes automated test suites
4. Implementation is format using Prettier
5. Create a pull request on the branch
6. Pull Request passes CI checks:
    a. Frontend/Backend Builds
    b. Frontend/Backend is format using Prettier
    c. Automated Test Suites Pass
7. Pull Request receives at least two approving manual reviews
    a. Any Requested Changes must be resolved
8. Pull Request is up-to-date with main branch
    a. If not, the update and conflicts are to be resolved on the Pull Request branch.
9. Pull Request is merged, task is complete
